knitr kable for table formatting

Leighton

2023-10-06

This example uses knitr kable for additional table formatting.

```
df <- data.frame(player = c('AJ', 'Bob', 'Chad', 'Dan', 'Eric', 'Frank'),
                 position = c('A', 'B', 'B', 'B', 'B', 'A'),
                 points = c(1, 2, 2, 1, 0, 0))

#view data frame
knitr::kable(df[1:6, ], )
```

player	position	points
AJ	A	1
Bob	B	2
Chad	B	2
Dan	B	1
Eric	B	0
Frank	A	0
